

INFRASTRUCTURE IMPROVEMENT COMING

CITY OF DE SOTO, KS
EDGERTON ROAD

Edgerton Road reconstruction to 3-lane section with sidewalks and bike lanes.

WHY?

The purpose of the project is to provide an improved roadway for development and growth in De Soto. Edgerton Road will be expanded to three lanes with sidewalks from Highway K-10 south to 103rd Street.

Benefits of improving Edgerton Road include:

- ✓ Increased safety for vehicles and pedestrians.
- ✓ Improved travel times for commuters.
- ✓ A transportation system designed to service new businesses and future growth.
- ✓ Improved response times for emergency services.

WHAT?

Edgerton Road is being reconstructed to a 3-lane corridor with sidewalks and bike lanes. The current estimate of the Edgerton Road improvements is \$6 Million.

WHERE?

The project location is along Edgerton Road, from Highway K-10 on the north to 103rd Street on the south.

WHEN?

Design and pre-construction tasks were completed in 2022. Construction of road improvements began in January 2023 and are expected to be completed by October 2023.

WHO?

- **Owner:** City of De Soto
- **Developer:** Flint Development
- **Engineer:** BHC Engineering
- **Contractor:** Haupt Construction

The City of De Soto is committed to informing residents and businesses about what they can expect and how they can provide input into infrastructure improvement projects.

Check out the interactive map that details major infrastructure projects online. Residents can find detailed information about each city infrastructure project – including contact information. Go to: desotoks.us/projects.

WHAT SHOULD I EXPECT?

Community infrastructure projects such as roads, sewers, water lines, storm drainage, energy, and communications can be disruptive during the planning and construction period. Once complete, the community benefits from the infrastructure needed to support a high quality of life and growth for the future.

CONSTRUCTION PHASE: You can expect heavy equipment and trucks, travel delays, and nuisance dust and noise during construction and installation. Generally, hours of operation for construction are limited to 7 a.m. to 7 p.m. M-F and other times with special permission. Roads may be temporarily closed, and utility services shut off for short periods of time. Delays and changes in travel routes can be expected throughout construction. There may be reduced access to property, sidewalks, and driveways.

**How will I know what is happening, when?
And will they need access to my property?**

www.notifyjoco.org

Any access or service interruption to property along the construction route is given in advance. We'll do our best to notify everyone impacted by infrastructure project work, especially if there are closures or disruption in service. We use door hangers, mail letters, post information on the City's website, and use Notify Jo Co (please sign up for it at left).

What will be restored following construction?

Trees, walls, sidewalks, fences, grass, plantings, monument signs, etc. will be restored if damaged due to construction activities.

PROPERTY QUESTIONS

Understanding Property Access via Easement & Property Ownership of Right of Way

Property Access via Easement: Generally, existing utilities are located within the road right-of-way or within an easement across privately held land.

- You still own that property but there is a legal agreement between you as the property owner, and the holder of the easement (usually a public utility or agency). The right to access your property where the easement is located may have been given long ago and is documented on your property record at the Johnson County: <https://aims.jocogov.org/>
- An easement allows access to your property to install or maintain infrastructure including utilities and roads as well as to be used by public safety vehicles for the good of the community. This access is typically for a short duration during field investigation and for the duration of the construction work and restoration of the site.
- Field investigators, contractors, and surveyors should be easily identifiable, and should carry official identification. They shouldn't need access to your home, just the part of the property where an easement was previously granted.

Property Ownership of Right of Way: Typically, there is a strip of land adjacent to the edge of the roadway that is owned by a governmental entity (City, County, or State) This strip is called a public right-of-way.

- You likely do not own the property all the way to the street in front of your home or business. Public right-of-way is owned by the governmental entity for the benefit of the public. Check with Johnson County here: <https://aims.jocogov.org/> to review your property lines to determine the general extent of the right-of-way adjacent to the street.
- Field and construction workers can access right-of-way because the governmental entity owns the property. There is no requirement to ask permission of the adjacent property owners. If there is a need to access your property outside of the right-of-way a Right of Entry (ROE) agreement will be requested.

SCHEDULE

Study/Design: Completed

Design & Pre-Construction
Completed 2022

Construction:

January 2023 to October 2023
