

INFRASTRUCTURE IMPROVEMENT PROJECT

**KANSAS DEPARTMENT OF TRANSPORTATION (KDOT)
LEXINGTON AVENUE INTERCHANGE**

Lexington Avenue and K-10 interchange improvements to service current and future growth.

WHY?

The purpose of improving the Lexington Avenue Interchange is to provide a transportation system for current development and future growth in De Soto.

Benefits of improving Lexington Avenue/K-10 Interchange include:

- ✓ Increased safety for vehicles and pedestrians.
- ✓ Improved travel times for commuters.
- ✓ A transportation system designed to service new businesses and future growth.
- ✓ Improved response times for emergency services.

WHERE?

Lexington Avenue and K-10 interchange.

WHAT?

Lexington Avenue and K-10 interchange added lanes to the on and off ramps. Signals were added at the eastbound and westbound ramps. The interchange at K-10 with Lexington Avenue is an improvement by Kansas Department of Transportation (KDOT).

WHEN?

COMPLETED MARCH 2023.

Design and pre-construction tasks were completed in October 2022 with construction of road improvements from November 2022 and to March 2023.

WHO?

- **Owner/Engineer:** KDOT

The City of De Soto is committed to informing residents and businesses about what they can expect and how they can provide input into infrastructure improvement projects.

Check out the interactive map that details major infrastructure projects online. Residents can find detailed information about each city infrastructure project – including contact information. Go to: desotoks.us/projects.
